

AYMAN EID

Gazinatep, Turkey ♦ +905384600675 ♦ eymeneed@gmail.com ♦ linkedin.com/in/eymeen

Expert Backend engineer building and optimizing high-scale production systems. Worked on global hosting infrastructure and financial platforms under sustained load, reducing system overhead by 5x and increasing API capacity by 30%. Experience with distributed services, performance bottlenecks, and reliability in real-world environments.

SKILLS

- | | | |
|------------------------------|------------------------------------|----------------------------|
| • PHP, JavaScript | • Unit & Integration Testing (TDD) | • CI / CD |
| • Laravel, Yii | • Docker, Kubernetes | • AWS/GCP/Azure |
| • SQL/NoSQL databases, Redis | • Message Queues | • Monitoring/observability |
| • OOP & MVC | • API design & versioning | • Microservices |

WORK HISTORY

Senior PHP Developer 07/2024 - 07/2025

WebPros (Plesk) – Houston, Texas, USA · Remote

Architected distributed caching with Redis Cluster for Plesk platform (10M+ websites), reducing database queries by 60% and panel load times by 45%. Migrated legacy components to Kubernetes microservices, enabling daily deployments and improving API response times from 1.2s to 400ms.

Senior PHP Developer 02/2024 - 08/2024

Quality Media – Gaziantep, Turkey

Built Laravel-based restaurant POS system handling 10K+ daily transactions. Reduced server load by 5x through Redis caching and database optimization, cutting invoice processing from 8s to under 1s.

Senior PHP Developer 10/2022 - 04/2023

Ossos (zFloos) – Kuwait · Remote

Optimized SaaS financial platform APIs by 30% through indexing and Redis caching, doubling user capacity to 5K+ active businesses. Implemented Laravel queues for background processing, reducing response times by 40%.

Full-Stack Developer 08/2021 - 11/2022

Taptok – Miami, Florida, USA · Remote

Architected multi-tenant SaaS platform handling 100K+ monthly transactions on AWS (EC2, RDS, Docker). Reduced checkout time from 3s to 800ms via query optimization and Redis sessions.

Senior PHP Developer 12/2020 - 02/2022

Inisev – Qormi, Malta · Remote

Built WordPress plugins with microservices integration handling 50K+ daily API calls. Improved site performance by 35% through caching and database optimization.

Junior PHP Developer 6/2018 - 11/2020

Ossos (zFloos) – Kuwait · Remote

Optimized financial management software for 500+ daily users, cutting report generation by 25%. Implemented API rate limiting and refactored legacy code, reducing bugs by 40%.

Self-Directed PHP Developer (Open Sourcer) 02/2017 - 6/2018

Independent

Contributed to Laravel, Symfony, and WordPress open-source projects while building custom applications. Established foundation in OOP, design patterns, and testing methodologies.

LANGUAGES

ARABIC: Native language

ENGLISH: C1 (Advanced)

TURKISH: C2 (Proficient)

EDUCATION

BSc Software Engineering

Portsmouth University – Portsmouth, UK
